

YOLO Environment Setup

YOLO Environment Setup

1. One-Click Installation
2. Installation Directory
3. Example Source Code Porting

This chapter applies to those who set up using the RDK official image. If you are using the YAHBOOM version image, you can ignore this tutorial.

1. One-Click Installation

The following command automatically installs the environment required for yolov26. Please wait patiently.

```
pip install -U ultralytics --break-system-packages
```

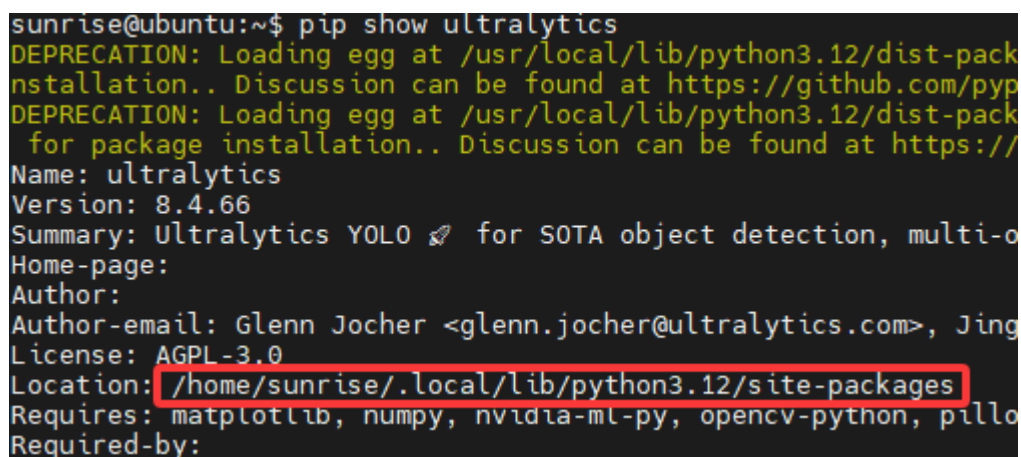

After installation is complete, restart the RDK development board.

```
sudo reboot
```

2. Installation Directory

Use the following command to view the installation directory

```
pip show ultralytics
```

```
sunrise@ubuntu:~$ pip show ultralytics
DEPRECATION: Loading egg at /usr/local/lib/python3.12/dist-pack
installation.. Discussion can be found at https://github.com/pyp
DEPRECATION: Loading egg at /usr/local/lib/python3.12/dist-pack
for package installation.. Discussion can be found at https://
Name: ultralytics
Version: 8.4.66
Summary: Ultralytics YOLO for SOTA object detection, multi-o
Home-page:
Author:
Author-email: Glenn Jocher <glenn.jocher@ultralytics.com>, Jing
License: AGPL-3.0
Location: /home/sunrise/.local/lib/python3.12/site-packages
Requires: matplotlib, numpy, nvidia-ml-py, opencv-python, pilla
Required-by:
```

The source code is in the /home/sunrise/.local/lib/python3.12/site-packages/ultralytics directory.

```
cd /home/sunrise/.local/lib/python3.12/site-packages/ultralytics
```

3. Example Source Code Porting

Port the source code provided in the materials to the /home/sunrise/ directory.

```
sunrise@ubuntu:~/ultralytics26$ ls
assets  output  videos  yolo26n-cls.pt  yolo26n-obb.pt  yolo26n-pose.pt  yolo26n-seg.pt  yolo26n.onnx  yolo26n_ncnn_model
data    runs    yahboom_demo  yolo26n-cls_ncnn_model  yolo26n-obb_ncnn_model  yolo26n-pose_ncnn_model  yolo26n-seg_ncnn_model  yolo26n.pt
```

Add environment and permissions

```
pip install ncnn --break-system-packages
pip install --break-system-packages "onnx>=1.12.0,<2.0.0" onnxruntime "onnxslim>=0.1.82"
pip install --break-system-packages pnnx
```

```
chmod +x /home/sunrise/ultralytics26/yahboom_demo/*
```
